

Production Access Questionnaire

Testers Community

The objective of this report is to provide comprehensive answers that our clients can use to fill the production access form. You can use the answers directly or can make changes based on how you improved the app. After 14 days of testing, users will be prompted to fill a form on closed testing to get access to production. This document can be helpful in answering those questions.

App Name: Segurcel

App URL:
https://play.google.com/store/apps/details?id=com.segurcel.segurcel

Production Access Questionnaire

1) How did you recruit users for your closed test? For example, did you ask friends and family, or use a paid testing provider?

We used a paid testing provider to obtain comprehensive and detailed feedback on the app. Additionally, we reached out to some of our target users, including tech-savvy individuals and security-conscious consumers, to gather real-world insights from the intended audience.

---

2) How easy was it to recruit testers for your app?

Answer: Easy
(You can select your own answer).

---

3) Describe the engagement you received from testers during your closed test

Testers actively engaged with the app, providing valuable feedback on user experience, feature clarity, and navigation. Their insights led to essential

improvements, such as enhancing the onboarding process and optimizing the app's overall usability, fostering higher user satisfaction.

---

4) Provide a summary of the feedback that you received from testers. Include how you collected the feedback.

Testers highlighted the need for a dynamic walkthrough for new users, improved ASO description, feature-rich screenshots, a "Rate Your App" button, and a "Share App" option. Feedback was collected through structured surveys and direct communication via feedback forms.

---

5) Who is the intended audience for your app?

SegurCel is designed for individuals seeking robust password management and digital security. It caters to tech-savvy users, families, and professionals who prioritize privacy and wish to securely manage sensitive information across multiple devices.

---

6) Describe how your app provides value to the users.

SegurCel enhances digital security by offering advanced password management features, including end-to-end encryption, a built-in 2FA

authenticator, and a health audit scanner. It ensures users can securely store and manage sensitive information, prioritizing their privacy and safety.

---

7) How many installs do you expect your app to have in your first year?

Answer: 10k - 100k
(You can select your own answer).

---

8) What changes did you make to your app based on what you learned during your closed test?

Based on user feedback, we implemented a dynamic walkthrough for new users, optimized the app description for ASO, enhanced screenshots to showcase features, and added "Rate Your App" and "Share App" options, significantly improving user engagement and experience.

---

9) How did you decide that your app is ready for production?

After thorough testing and incorporating critical feedback from a diverse group of testers, we resolved key usability issues, enhanced security features, and ensured the app is stable and user-friendly, confirming its readiness for successful deployment on Google Play.

---

10) What did you do differently this time?

This time, we focused on gathering extensive feedback from a broader range of testers, refining the onboarding experience, and optimizing marketing materials. These strategies resulted in a more polished app that effectively meets user needs and is ready for production.

You can use the above answers or add your personal touch to those answers to make them more natural and meaningful. Don't forget that this form plays the most important role in the entire process of getting production access. If you have any more questions, please feel free to contact us.

Best regards,
Testers Community Team
